

Liberalism and Orthodox Democracy

«It is more convenient to pass to a camel through eagle ears, rather than rich enter Empire of Got» (Matthew 19:24; Mark 10:25; John 18:25).

In a counterbalance of this divine sermon Jean Calvin has developed doctrine Augustine Blessed about absolute predetermination. Calvinists believe, that God in days of Creation has determined to each person up to end of times to whom to be the righteous person, and to whom the sinner. Any person cannot know a plan divine, but there is a help. If the person has become successful in this life and in the next world God of him will not leave and if the person the loser to him one road - in a Hell. Even it is possible to not pay attention to sins - all the same elite is waited with a place in paradise! The God likes, whom wants, to it better. So the Calvinism became ideology of bourgeoisie and a basis of formation of ideology of liberalism.

The Calvinism in due course was divided into set of currents and directions, mostly radical, is generalized them it is possible to name puritans. Distinctive economic feature of puritans was counteraction to payment of any taxes, including tithe. Puritan currents have given birth to movements of Quakers, Nonconformists, Presbyterians, Congregationalists. Also, probably, in 16 century puritans have formed a secret society, which has collected in itself the richest and considerably adjusted sectarians. This secret community exists till now, and his members are many billionaires, Presidents the USA, Vice Presidents, Prime-minister - the Ministers, working heads of CIA, FBI, MI-7 and other departments of America and the Great Britain. The basic tool of secret community on management of the world - the theory of plots.

In 17 century it became uncomfortable to puritans to live in England, them began to pursue and have declared sectarians, and their doctrine heresy. Radicals had to leave England and to find a time haven in Holland in 1608. But in 1620 they have got two old ships with the help of League of the London merchants, one of which has there and then sunk, and on sailing vessel "Mayflower" 102 sectarians have gone from Plymouth to New England. Colonists have landed in Cap - Code (Massachusetts) in December and have decided to remain there. After the first severe winter half of immigrants has died. Subsequently 102 people began to name these the fathers - pilgrims and have founded a holiday in their honor « Day of Gratitude » in the USA. By the way, Secretaries general of the NATO the USA, the Great Britain and Holland (brothers - puritans) appoint only citizens.

Then new waves of immigrants have followed and in 1681 William Penn has based a colony of Quakers in Pennsylvania. Thus, New England was based basically by considerably adjusted followers of a Calvinism. New England has made skeleton of the future the USA. For preparation of the managing staff, lawyers, businessmen puritans have founded Harvard University in 1631 and Jell University in 1701. Diplomas of these Universities speaks not only about good formation, but also about adherence to radical Puritan currents.

Further puritans were the center of the Republican Party the USA. Therefore the periods of board of republican administration are connected to continuous aggression against any heterodoxies of political trends all over the world. Radical puritans also have accepted active participation in formation of the concept of liberalism on Anglo-Saxon manners. Liberalism and the theory free business applied for the status of the rational doctrines, deprived any superstitious mystifications. Actually Anglo-Saxon liberalism is penetrated with ideology of a Calvinism and is alien not only to Orthodoxy, but also the European religious traditions, Judaism, and, certainly, to the Islam. For all world, except for narrow group of puritans the USA, the Great Britain, Holland and Denmark this ideology is sectarian. Anglo-Saxon liberalism besides it is actively aggressive.

One of priority directions of aggression of puritans is centuries-old struggle against Russia. The reasons of this hatred, besides religious, historians should find. Probably, this hatred is caused by vassal dependence of Europe on Golden Horde, and then on friendly Russia Empires Ottoman. Problems of this aggression consist in political and physical destruction of Russia. Probably puritans considered, that only Russia can resist to their world supremacy. And conversations about barbarity, laziness of Russian people only a screen covering avidity and aspiration to creation of own Global Empire.

It is necessary to recognize, that the first diplomatic victory of puritans was planting dynasty Romanov on the Russian throne. It is obvious, that the first puritan on the Russian throne was Peter the Great (we shall recollect his trips to Holland and England). Then, Russian tsars adhered to membership of other secret society, so powerful. Within the framework of this world rivalry campaigns of Napoleon against Russia, prejudice Turks against Russia by England become clear during centuries on conducting wars with Russia, the Caucasian wars. In these wars the victory has remained beyond Russian Empire.

In the twentieth century all World wars secretly or were obviously provoked by Englishmen with a direction of the main impacts across Russia. Including, V. Lenin's trip to the car with gold through the struggling Germany for the organization of revolution becomes clear. The invention on destruction of Russia by Bolsheviks has obviously gone right, but arrival of dictator Stalin has spoilt puritans all game. In view of told will not be a secret and provocation by Great Britain of the Germany's Holocaust, with the subsequent creation of the independent Jewish state Israel. First another's hands have carried out a genocide of Jewish people, then have sent on continuous war with Arabs in desert of Palestine. All was done ostensibly for the blessing of Jewish people. The politics of destruction of Jews, however, as well as Russian people (Russian empire - the native land of Jews) was actually carried out.

In the modern world, after disintegration of the USSR and East block, cold war as if has ended. Actually it has been continued as Globalize, the One Polar world, struggle against an Islam, the international terrorism. These are components of world war of puritans for domination on the Earth. Only one calms - we are not threatened with new World wars with application of the nuclear weapon. Otherwise the civilization of puritans can be destroyed, and they cannot take pleasure in the riches in this life.

The most important weapon of puritans is the dollar. The dollar is modern international Got, an embodiment of superstitious mystifications of an early Calvinism. The more it is more than them, the more successfully their owner. Money do not smell, etc., etc. In What way the person has scared together a fortune - killed, stole, forced, used slaves, did not pay taxes - not important, the main thing his American dream was embodied. In the next world to it the indulgence on all sins of a worldly life is granted. To oppose dollar it is possible only ruble, as though it ridiculously now not seemed.

In 19 century K. Marx has noticed in liberalism not rationalism, and irrationalism. With our historical experience as it is difficult to refuse dialectics and definition of freedom as realized necessity.

So, in liberalism the basic maintenance it a recognition of freedom. Before people there is a moral and religious choice of Puritan freedom of terrestrial success or freedom of the universal values inherent in Orthodoxy, an Islam and Judaism.

The Concept of Orthodox Democracy should be formulated in a final kind, certainly, scientists and philosophers. But we can tell confidently, that the basis of orthodox democracy consists in a recognition and declaring forever Freedom, Freedom and Freedom. Freedom personal, political and economic. Freedom cannot be a little. The person is born free and nobody has the right to select or present her. The basic moral motive of orthodox democracy and liberalism should become a recognition of moral restrictions, to conformable basic religions. Only moral and just conducting a life in business, a policy, public and to private life will lead to rescue oppress after end of a

terrestrial way.

Following to moral principles of Orthodoxy, an Islam and Judaism will not be easy and simple, but these restrictions imposed by voluntary free person (nobody cancelled the option), will result within decades, and even centuries in desirable result. Following to traditions of the basic religions will be that irrational grain of orthodox democracy necessary for existence of progress. We cannot count progress creation of the One Polar world with domination on the Earth one radical Puritan sect, let the richest and prospering on a planet. Money it not the main value and achievement of mankind.

In formation of philosophical and moral components of the concept of orthodox democracy a determining role should play Orthodox Church about the Patriarch, Moslem with Advice of Muftis and followers of a Torah. Each faith can adapt general provisions and recommend the parishioners to adhere to the specific features connected to historical experience and traditions. Nobody has the right to condemn Moslems to following to laws of Seriate. Democracy and freedom of a choice behind each people and the separate person.

Now that should not be. At the concept of orthodox democracy there should not be an individualism, getting of success and material benefits by infringement of traditions and precepts of our peoples. Larceny, a deceit, evasion from taxes, drugs, murders, money-making, arrogance should be outside of the law.

Orthodox democracy will bring up not a society of consumers, and free community of businessmen, managers, scientific and technical and creative intelligence.

Our ideology does not arrange whom, can move to more suitable country or continent. Its this right, the right on a choice of a residence. To pursue or condemn for it is senseless. The violent manipulation someone in our belief too is restriction on freedom that is not comprehensible.

Acceptance of the concept of orthodox democracy in Russia as the basic force, capable to stop a **Virus of Puritanism** on a planet, will lead to restoration of two polar worlds, but these advantage will be not fatal antagonists or enemies. Civilized and democratic competition of two concepts of democracy and freedom will create base for progress and prosperities of mankind, without dependence from belief and material welfare.
