

The Martyr or Judas of liberalism

M. Khodorkovsky at the end of 80th years was the ranking officer of Frunzeskiy District Committee of Leninist Communist Youth League of Moscow. Has organized commercial structure flying the flag of LCYL with the name the Center of Inter Branch Scientific and Technical Programs or, in abbreviated form, MENATEP. There became strong friends and partners M. Khodorkovsky, M. Brudno, L. Nevzlin and P. Lebedev.

The basic kind of activity MENATEP was sale of an Automated Workplace (AWP), consisting of the personal computer and Russian Programs. AWP left under the price from 150,000 up to 250,000 Soviet rubles (at an official dollar exchange rate 0.62 rubles and speculative 10-12 rubles for dollar). The personal computer cost for cash about 30,000 rubles, and on the Contractual price of scientific and technical production, how many could pay the Soviet organizations and institutes. They paid for all in advance payment by non-cash rubles. Dodge consist that the personal computer was bought ostensibly in cash from private persons under the price making 90-98 % of the price of the consumer. Taxes and the salary to employees it was paid from 2-10 %, and more than 70 % of percent of the final price lay down cash in a pocket of partners. It is necessary to recognize, that they were not original so all dealers computers acted. On the one hand, on papers all is lawful, and on the other hand, more than 70 % of the income were hidden from taxes and left in shadow business, and on a revolution of cash currency 89 Clause Crime Codex operated. Everyone will draw the conclusion - who sold one who is not present - another.

In 1989 the same partners was open by Commercial Bank "MENATEP". Bank business worked not less effectively, than sale AWP (with a cash there were no problems). Then in 1993 "YUKOS" has been created. The history of this firm does not require comments. It is possible to tell confidently, that old principles of work and pricing were kept and perfected up to perfection. That there is an official bankruptcy of the chinks spent by structures of YUKOS, tons of oil obtaining on 10-50 thousand a month with the further purchase of "bankrupts" for one ruble. On the one hand it is ingenious, and on the other hand went. Such slippery ways showed and realized talent of the outstanding head and business M. Khodorkovsky, the official billionaire. The god is his judge. It is thought in judicial hearing can prove, that operated exclusively on laws in force and it corresponds to the validity. If certainly to overlook about a conclusion from Russia of tens billions dollars without payment of taxes.

Nevertheless, M. Khodorkovsky the outstanding person without exaggeration. A little who managed to scrape up in a history such fortune for short term. To the Western measures M. Khodorkovsky has carried out the American dream, what ways not important. The dream consists in terrestrial success and material prosperity. We shall touch theological sense of the American dream. It is formulated by radical Calvinists and Puritans of the Great Britain and the USA. This theory originates in 16 century in England, has received the embodiment in creation the USA. Its sense in American doctrine Manifest Destiny (divine or Absolute Predetermination). Puritans count themselves Redeemer Nation.

Many centuries there is a secret society of the puritans, put to itself a problem to grasp world supremacy. This grouping has blossomed especially strongly in the USA. These people count themselves the supreme nation on light, and everything, that they make the rest corresponds to divine predetermination, in the world from a devil. Him is given to correct the world, but management is carried out secretly, without publicity, with thorough training. Their basic rules are described by the theory of plots (conspiracy). Actually, now this grouping includes some thousand billionaires and multimillionaires. The general condition of these people makes many hundred billions dollars. In due course they

began to accept in the numbers of newly appeared billionaires such as the former President of Philippines Ramos, Ben Laden 's (recollect Osama Ben Laden) and, probably, a part of new Russian billionaires.

For any reason, most likely religious, this secret society was set many centuries ago to destroy Russia politically and physically. Long years they aspire to this purpose and have reached the big successes in this direction. Planting of dynasty Romanov, a campaign of Napoleon to Russia, uncountable Caucasian and Turkish wars, war with Germany, communist revolution in 1917, the Second World war, the Holocaust, creation of Israel, disintegration of the USSR and East Block, the right reforms and planting of liberalism in Russia 90th years, a genocide of Russian people, the Chechen war - stages of victories and defeats of a narrow ruling clique the USA and the Great Britain. Globalize, the One polar world, struggle against an Islam, the international terrorism is a part of modern world war of puritans for domination on the Earth. The most important weapon of sectarians are the money embodied in the American dollar. The dollar began got or a religious idol of 20 and 21 centuries to whom everyone worship and aspire to find through possession him influence on the world. This worship to avert people of many countries from the traditional religions: Christianities, Islam, Judaism.

For puritans it is war of goods (they) and evil (we and other world). For orthodox Christianity, Catholicism, Judaism and an Islam it is devilish sect and no more that.

M. Khodorkovsky and other Russian oligarchies of own will or have casually got on advanced this 500 years wars. The Russian oligarchies became the basic sponsors so-called right and liberals. The right reforms in Russia have led to occurrence of oligarchic capitalism, privatization, an impoverishment of the state, the population, prompt extinction of Russian people from poverty, illnesses, narcotics. These reforms cannot be counted right as they were carried out under the script of Puritan sectarians and have been directed just on physical destruction of Russia so, for example, M. Thatcher considers, that in Russia it is necessary to leave to live no more than 17 million person, and CIA more liberally - up to 70 million person. All right political parties in Russia, since the Apple and finishing Union of Right Forces, actually political propagandists of puritans. Probably, the most part of teammates does not suspect about it. Economic interests of puritans in Russia represent the large western companies, for example, Carlyle Group (family Bushs, D. Cheney, Beiker, Carlucchi, Major, Ramos, Ben Laden) or HollyBurton (D. Cheney and about the same persons). At last company, by the way, partner communications with Scientology, the Representative of the President in the Volga region, Mr. S. Kirienko (and crisis of 1998 have recollected).

Distinctive feature of Puritan liberals is applications for a cosmopolitan nationality (they citizens of the world, instead of awful Russia), continuous criticism of a management of Russia at the slightest pretext and without it. The majority of them wishes disorder and destruction of Russia from the big love to freedom, is direct as 100 years ago Lenin wished defeat of Russia in war with Germany. Than revolution has ended, we already know.

Historical digression. The first democrats and liberals were citizens of Ancient Greece and Rome, then England and France. Why puritans privatized the right on liberalism? Liberalism existed and in Russia at 18-20 centuries and was not Calvinist. The right on freedom to the person is given from a birth, instead of sects or the state. M. Khodorkovsky asserts from prison (not the best place certainly), that liberalism has died in Russia. Thank God! Has died and, I hope, the sectarian Puritan liberalism exported from the USA and the Great Britain never will revive. Liberalism the word Latin also has arisen it for hundreds years before occurrence of Calvinist revenge's. And in general it is not clear, how correspond Khodorkovsky, Brudno, Nevzlin, Gusinsky, Berezovsky, Abramovich to puritans? Nonconformists, Congregationalist count Jesus the Christ the unique pastor and the priest on the Earth, that Judaism, Orthodoxy do not accept. Their historical native land Russia, they Russian people, have earned money and a social standing in Russia,

what for it to sell the soul to puritans?

Before the Russian oligarchies there is a moral choice. Billions dollars never eat also you will not spend on drink. Abroad they only rich emigrants.

On the one hand, for imaginary colleagues and friends to puritans the Russian oligarchies bear an aura of martyrs. In direct and figurative sense. Our oligarchies are continuously pursued both in Russia and behind its limits. Now one, tomorrow will be others. Business constantly argues on flight of the capital from Russia. And in fact it not flight, and concealment from taxes (so puritans in England refused to pay even church 10%). Storage of the money obtained from realization of natural resources of Russia, the privatization, the stolen credits, abroad in dollars or other currencies cause irreparable damage to economy of Russia, but thus help the economy of the countries which have sheltered these capitals. Though as soon as possible this money can be always confiscated for the benefit of the Western democracies. However, confiscation is not obligatory, in fact money already was displaced from one pocket to another (trousers same).

On the other hand, Judas's thirty silversmiths, the dollars of M. Khodarkovsky transformed by 30 billion with associates, betray the Native land Russia and sacrifice to its sectarians - to the puritans, come nearer as is never close to world supremacy. Repentances and apologies to not do without. Put in philosophies, religions and personal decency.

To misters to oligarchies as to free people, it is necessary to be defined, or they with puritans and support utter annihilation of Russia, construction of the One Polar world with the USA in the chapter for many centuries (Novus ordo seclorum), or they come back home with the money or without them and build new free and democratic Russia.

In construction of new Russia a key role **the concept of orthodox democracy**, and the attitude to it will play oligarchies will play a main role in a history. In case of its acceptance, flight of the capital from Russia will be stopped, the vector of development of the country and world around will change from a minus on plus.

Orthodox democracy will restore a bipolar structure of the world, civilized and all-comers competition of two directions of development of a society. Presence of money and material riches, is welcomed by all religions, but it not the main thing in our civilization, there are also other values, conformable to Orthodoxy, an Islam and Judaism.
